EDUCATION —

GEORGIA INSTITUTE OF TECHNOLOGY

Aug 2016 – Future

- M.S. in Computer Science
- Planned 2017 Coursework: Algorithms & Complexity, Machine Learning, Knowledge-Based AI

UNIVERSITY OF VIRGINIA

Aug 2012 - May 2016

- B.S. in Computer Science with dual degree in Financial Economics (Major GPA 3.52)
- Relevant Coursework: Database Systems, Cloud Computing, Operating Systems, Mobile App Development, Information Retrieval, Algorithms, Econometric Methods, IBM's Introduction to Hadoop
- Awards:
 - School of Engineering Kerr Family Scholarship for leadership and academic merit for 2015-2016
 - o Hack.UVA 2016 Best Mobile App
 - o AngelHacks Febreze Home 2017 Winner

CODEPATH @ SF STATE

Jan 2017 - May 2017

TA and student for Facebook sponsored PHP Web Security course

= EXPERIENCE =

SOFTWARE ENGINEER, ZAPLABS

Aug 2016 - Present

- Utilized Spring, Hibernate, and Oracle SQL DB to design, build, and test RESTful API endpoints
- Integrated Yelp and Intercom API to help increase broker user base by about 7%

JR BACKEND ENGINEER, ALKEMY

Jan 2015 – Dec 2015

- Designed, implemented, updated, unit-tested, and documented backend Django API
- Functionalities included making calls to Google's geolocation API and querying MySQL DB

SOFTWARE ENGINEERING INTERN, AKAMAI

May 2015 – Aug 2015

- Added custom functionality to C jansson library to handle JSON more efficiently, saved on average 5-6 seconds per virtual machine
- Wrote Perl and Python scripts to automate network address translations and deployment tasks

SKILLS —

LANGUAGES: Python and Pip/Conda/Virtualeny, Node and NPM/Yarn, Java and Maven, React/Redux and Webpack

TECHNOLOGIES: Git, Amazon Web Services, Google App Engine, Heroku, MySQL, MongoDB, Redis, LINUX/UNIX, RESTful APIs, GraphQL, Blockchain

PROJECTS

HACKERS @ UVA: Started student community that fosters lifelong learning, promotes hackathon culture

HACKATHON ENTHUSIAST: Participant of HackMIT, PennApps, JP Morgan: Code for Good (finalist) HackPrinceton, TreeHacks (mentor), HackDuke (top 10 finalist & mentor), Hack the North, AngelHacks – connected various API's such as Twilio and Amadeus, built mobile and web apps using tech like MongoDB (Ask Me Anything!)

GOOGLE CARDBOARD: My current project involves taking a Udacity course on Computer Graphics and using three.js and WebGL to create 3D web pages and models, ultimately hoping to transition onto Google Cardboard
